floor skirting «85»

Floor skirting Ecoline has an assembling optimal size (50*23 mm) and a robust keyed part of the cable conduit. Skirting colors match the most popular laminate and linoleum colors. Soft edge of the skirting bears against the wall surface, replicating the relief and prevents gaps between the wall and the skirting. Overlap angle between the wall and the floor makes 25 mm after installation. The skirting is easy to install by means of screw-driver or electronic tools.

FINISHING PROFILE (DOOR TRIM)

FOAMED PVC

The profile is designed for interior and exterior finishing and is best suited for decorating gaps when installing doors and windows or decorating radiator grills, edging, frames, etc. The profile package is 5 units in stretch film, euro-box contains 7 packages, which provides safety of goods in transportation, storage and layout. It also provides comfort for the end consumers. The profile is available for retail sale in a 5 pieces set.

		package size
2,2 m	35 pcs/pack	221x20x12 cm

Color scheme for PVC trimmer

white	beech	light beech
cherry	oak	whitened oak
maple	mahogany	alder
nut	wenge	

FINISHING PROFILE (DOOR TRIM)

WITH CABLE-CONDUIT

Door trimmer with a special system of internal installation represents a figure plank for window and doorway framing as well as for any aperture decorating. Compared with traditional trimmer, the profile with a cable –conduit has a great advantage –facility to run telephone, computer, and electricity cables. This conceals the non-aesthetic cable tangle and provides additional isolation and protection against external damage. Hidden intertwining makes possible invisible trimmer installation.

		package size

Unique incomparable in the Russian market profile!

Unique profile incomparable in the Russian market of finishing materials. With this profile you can make the external corner ideally even easily and without any effort. The corner allows to conceal all roughnesses on the border of corner junctions of wallpapers and to fix wallpapers securely, giving the room a noble and finished look.

The corner is resistant to abrasion, high temperatures and moisture threat. It has a special high strength structure of wall-sides and angle stiffener. If necessary, the corner can be painted in any colour. Formaldehydes and lead free. The corner can be installed on any surface easily and securely.

декоративные защитные углы

«doorsills»

Aluminum profiles (doorsills) are designed to hide compensation joints, junctions of floor coverings, to decorate conversions between floor coverings, giving the interior a finished look. Due to material strength, aluminum doorsills withstand considerable daily mechanical pressure in the places with high traffic intensity.

- A WIDE RANGE OF COLOURS**
Allows selecting a profile for any floor covering.
Doorsills coating does not depend on fixation type.
Colour scheme matches the most popular colours of Decoplast TM floor skirting.
- AESTHETIC DESIGN**
Decorative covering has a 3-layer nano-coating with protective varnish.

- ASSEMBLING IS EASY AND STEADY**
The doorsills are stocked with fixing elements of optimal size – 3.5*40 mm. Self-drilling screw (fired pin) totally rests in a slot with an open fixing.

- MINIMUM INVESTMENTS**
The doorsills come 0,9 and 1,8 m long, 6 pieces in the package. The doorsills 2,7 m long come 10 pieces in the package.

		package size
0,9 m	6 pcs/package	962x94x40 mm
1,8 m	6 pcs/package	1850x95x40 mm

ADHESIVE

MULTIFUNCTION POLYMER ADHESIVE "TAIFUN"

The adhesive is used for clueing polystyrene goods, parquet, ceramics, wood, cork, fitted carpet, artificial leather, paper, textile, etc. The adhesive is used for clueing abovementioned materials to each other or other combinations, as well as for clueing these materials to concrete, cement-lime, plaster, stucco and brick surfaces. After drying out the adhesive makes a colorless watertight seam. Methanol free. Heat and water-resistant

- "TAIFUN" provides enhanced adhesive characteristics compared with other polymer adhesives (quick set, firm joint)
- Works in different temperature conditions
- Suitable for all kinds of finishing materials
- Service life - 3 years

MULTIFUNCTION POLYMER ADHESIVE "EKO-HACET"

The adhesive is used for clueing polystyrene goods, parquet, ceramics, wood, cork, fitted carpet, artificial leather, paper, textile, etc. The adhesive is used for clueing abovementioned materials to each other or other combinations, as well as for clueing these materials to concrete, cement-lime, plaster, stucco and brick surfaces. After drying out the adhesive makes a colorless watertight seam. Methanol free. Heat and water-resistant.

BATHTUB SCREENS

decorative

52-62 cm
1,5 m; 1,7 m

Bathtub screens hide plumbing communication lines and provide additional usable area for storage. Screen frame without side racks is compatible with any kinds of bathrooms both with external and internal plumbing communication lines. The screen height is adjusted via the feet from 52 cm up to 62 cm. Free air circulation under the screen prevents the mould. Each screen is packed in thermo-film. The screens come assembled in two sizes - 1.5 m and 1.7 m. (other sizes are made to order)

"Comfort" collection
Contents: plastic frame + 3 PVC panel curtains with self-stick film + plastic handles.

“Product package” service

Decoplast company has developed and implemented the service of packing manufactured products. Package service guarantees goods delivery up to the shop-shelf safe and sound.

All the conceptions on offer are packed on special trays and ready for delivery by any means of transport with minimum expenses. Upon purchasing a certain conception, the customer gets 100% packed on tray product and a show-stand, which serves as a shop-window and a storage facility at the same time.

Decorative interior panels (aprons) are packed in a cardboard box ten pieces in pack. In assortment. Air-bubbling film is layed on the bottom of the box. Panels are layed onto the film (under 10pieces). After laying, the panels are covered with an air-bubbling film and the box is closed with a top. Packed box is scotch-glued circularly in 3-5 places for the best top and bottom fixation.

Decoplast company has developed a special transport package for the most comfortable transportation of “Mosaic” PVC panels. “Mosaic” PVC panels come 10 packs in a cardboard box. (in assortment)

Packed box is scotch-glued for a safe fixation. To provide safety of goods during transportation to place delivery, we have worked out special long pallets for laying linear articles. Special laying, strapping and stretching of collected rigid pallet provide goods at-place delivery without defects.
